

Active Directory

The Zoho One Sync Tool allows you to sync your employees' identities from your existing LDAP server to Zoho One. This enables you to maintain those identities in a single place, without having to add, edit, or disable employee accounts manually. Since the tool performs a one-way synchronization where information flows from your LDAP server to Zoho, your information will never be compromised.

The screenshot displays the Zoho One Sync Tool interface. On the left is a navigation sidebar with options like Dashboard, Organization, Applications, Users, Admins, Groups, Domains, Security, Device Management, Marketplace, Active Directory (highlighted), and Reports. The main content area is titled 'Active Directory' and contains the following text:

Zoho One Sync Tool is a secure directory and password synchronization tool, which performs a one-way sync from your existing LDAP server to Zoho One. This enables you to maintain all your user identities in a single place, without having to add, edit, or disable user accounts manually in Zoho One.

Since the sync always happens from the LDAP server to Zoho, the data in your LDAP server is never compromised.

System Requirements for Zoho One Sync Tool:

- .NET Framework - 4.6 or later

System Requirements for Password Sync Agent:

- Administrative privilege in Active Directory
- .NET Framework 2.0 or 3.5 installed in all domain controllers, along with the HTTP Activation and Non-HTTP Activation features.
- Message queuing service

Instructions to set up Zoho One Sync Tool:

- Install and sign into the Sync Tool.
- Add your LDAP domains to the Sync Tool.
- Configure sync settings.
- Sync manually, or schedule an automatic sync.
- Install Password Sync Agent if needed.

A 'Download' button is visible at the bottom left of the main content area.

Overlaid on the right side of the screenshot is a window titled 'Sync Tool' with a 'Directory Sync' tab. It shows a 'Sync Users' section with a table of user attributes created in the LDAP server:

| Name | Email | Status |
|--------------|----------------------------|-------------|
| abigail | abigail.anderson@zyker.biz | Not created |
| jacob | jacob.walsh@zyker.biz | Not created |
| scott | scott.fisher@zyker.biz | Not created |
| Emma Cartner | emma.cartner@zyker.biz | Not created |
| ryan | ryan.west@zyker.biz | Not created |
| Dante | dante@zyker.biz | Not created |

At the bottom of the Sync Tool window are 'Previous' and 'Next' buttons.

Before you download and run Sync Tool, ensure that you meet the [system requirements](#). Once you've downloaded it, check out the [instructions to set up Zoho One Sync Tool](#).

For more information, read our [help documents](#).
