Decimal

Weight (in kg)

56.77

The **Decimal** field is a form field to collect numerical data that includes decimal points, offering a more precise way to capture fractional values.

In the **Properties** of the field,

- You can provide placeholder text, offering a brief hint or example to guide respondents on the expected input.
- **Thousand Separator:** Automatically include a symbol (such as a comma or period) to separate groups of thousands when users input large numbers.
- **Rounded to:** You can set the number of decimal places allowed to ensure consistency and precision in the collected data.
- You can provide a Unit to a Decimal field to enhance clarity and context for respondents.

Validation

- **Mandatory:** Ensure that respondents cannot submit the form without entering the data in this field.
- **No Duplicates:** Prevent the submission of identical entries.
- **Allow Negative Value:** Allow respondents to input numeric values that fall below zero.
- **Include decimal input confirmation:** Selecting this option prompts the respondents to re-enter the decimal values for confirmation, ensuring that both inputs match, thus preventing typos.
