

# Add new Creator custom app

1. Sign in to [Zoho One](#), then click **Directory** in the left menu.
2. Go to **Applications**, then click **Add Application**.
3. Under *Custom App*, click **Build**.
4. If you haven't added Zoho Creator yet, you will be prompted to do so. Click **Add Zoho Creator** and finish adding Creator before continuing.
5. You will be taken to Zoho Creator, where you can [start building your custom app](#).
6. After you have built the app, go to the [Creator dashboard](#).
7. Under *My Applications*, hover over the app you want to add to your Zoho One organization.
8. Click **More**, then click **Add to Zoho One**. The application will be added to your Zoho One organization.

If you want to assign a user as a developer for that app:

1. Go back to [Zoho One](#), then click **Directory** in the left menu.
2. Go to **Applications**, then click on the custom app.
3. Click **Assign Users**, then choose the users.
4. Click **Developer**, then click **Assign**.

 Note: Learn more about [user roles](#) in Creator.
