

Add non-directory bookmarked/associated apps

1. Sign in to [Zoho One](#), then click **Directory** in the left menu.
2. Go to **Applications**, then click **Add Application**.
3. Under *Non-Directory App*, click **Add**.
4. Name the app and enter a description if needed.
5. Click **Select SSO mode**, then select **Linked Sign-On** to add a [Bookmarked App](#), or **Linked Sign-On Using Parent** to add an [Associated App](#).

 **Note: Linked Sign-On Using Parent** will be available only if a Marketplace app or a Non-directory SAML app has been added already.

6. If you chose **Linked Sign-On Using Parent**, then select the parent app from which the SAML details should be inherited.
7. Enter the URL of the landing page under URL.

A screenshot of the 'Integrate application' dialog box. The dialog has a title bar with a close button. It contains the following fields:

- Sign-In Type:** A dropdown menu with a red asterisk, currently showing 'Associated app'.
- Associated app:** A dropdown menu with a downward arrow, currently showing 'G Suite'.
- Select Parent App:** A dropdown menu with a red asterisk, currently showing 'G Suite'.
- URL:** A text input field with a red asterisk, containing 'gmail.com'.

At the bottom, there are two buttons: a red 'Done' button and a grey 'Cancel' button.

8. Click **Done**, then click **Create**.
9. Click **Manage App** to assign the app to users, **Open App** to access the app, or **OK** to continue adding apps.
