

Schedule Trigger

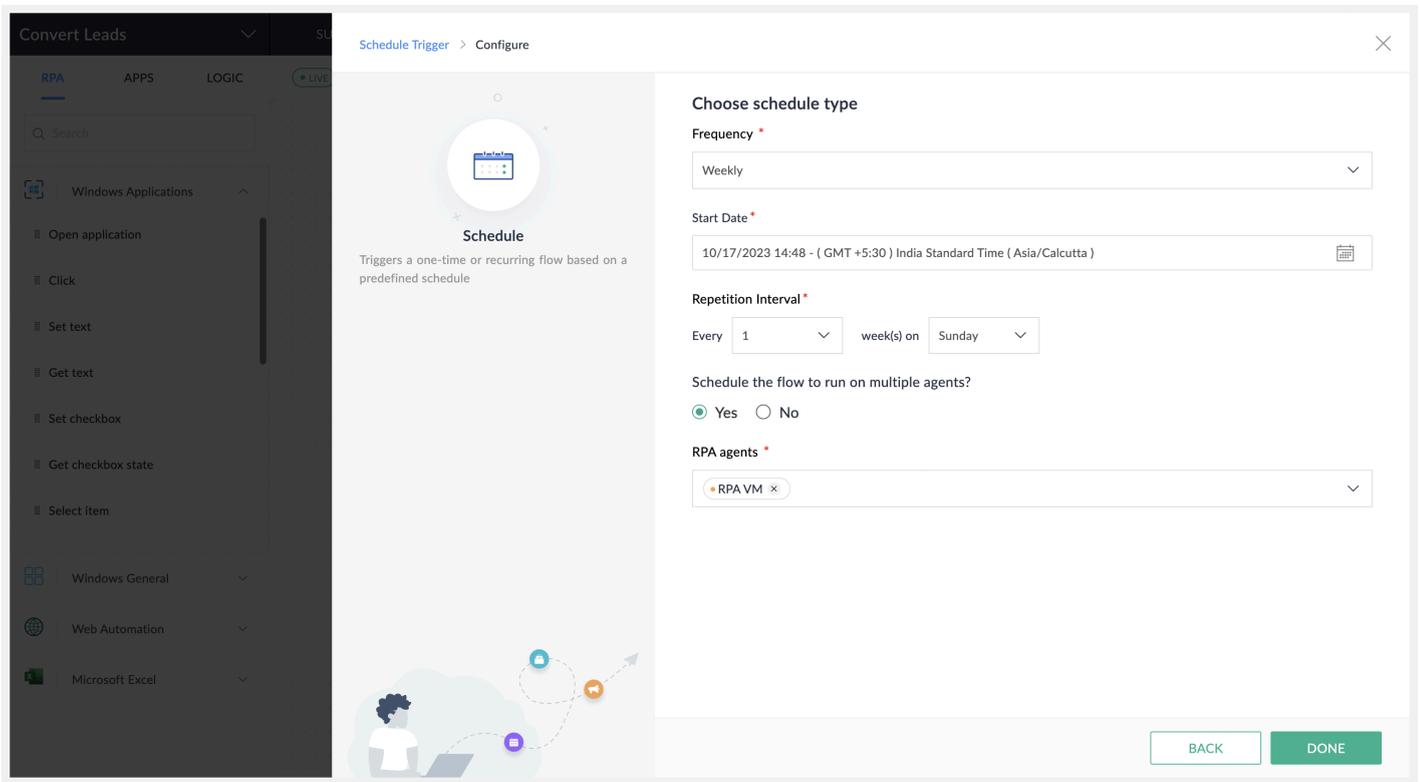

Schedule trigger is a type of trigger that allows users to trigger a flow based on a specific time period or interval. This is useful for automating tasks that need to be performed on a regular basis, such as sending out daily reports or backing up data.

How to configure

1. In the *My Flows* section of Zoho RPA, click + **Create**, then **Create flow**.
2. Enter the flow name, and optionally a description.
3. Click **Create**.
4. Click **Configure** in the *Schedule trigger* box.

5. Choose the frequency of your flow execution. You can schedule your flow to be triggered daily, weekly, monthly, yearly, or even just once.
6. Fill in the required details, including month, year, date, and time.

7. To schedule your flow to run on multiple agents:

Select **Yes** to the question, Do you want to schedule to run flow on multiple agents?

Choose the required RPA agents.

8. Click **Done**.
