

TSheets

What is TSheets?

TSheets is time-tracking software that you can use to view real-time reports, build employee schedules to manage payroll, and set up overtime alerts.

How to connect your TSheets account to Zoho Flow

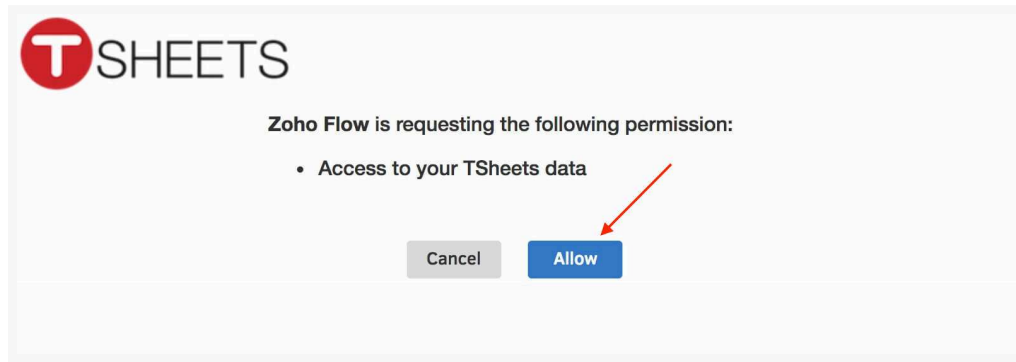

1. Select the required trigger or action. If you select a trigger, click **Next**.
2. If there are no other TSheets connections in your account, click **Connect**. Otherwise, click **New connection**.

Alternatively, you can create a new connection by navigating to **Settings**, then clicking **Connections**. Click **Create connection** and choose **TSheets**.

3. Enter a **Connection name** and click **Authorize**.
4. Enter your TSheets credentials in the pop-up.

5. Click **Allow** to authorize Zoho Flow to access your account.

API documentation

If you experience any TSheets-related errors in your flows or if you wish to learn more about the TSheets API, the API documentation can be found [here](#).

Triggers and actions available in Zoho Flow

Triggers

[New job](#)

Notify your team through chat, create tasks, or add tickets to keep track of new jobs.

[New or updated timesheet entry](#)

Create or update tasks, spreadsheet rows, and expense reports, based on new or updated timesheet entries.

[New timesheet entry](#)

This trigger lets you manage budgets, create invoices, and send emails when a new timesheet entry is created.

[New user](#)

Use this trigger to sync user data with your accounting, ticketing, and CRM software.

Actions

[Create timesheet entry](#)

Create timesheet entries based on calendar events, form entries, or spreadsheet rows.

Create user

This action lets you create users based on new contacts in your payroll or expense reporting applications.

Fetch job code

Use this action to fetch more details about a job code.

Fetch payroll report

Fetch the details of the payroll report to get more details.

Fetch user

Fetch user details to check if the user exists in your TSheets account.
