

Zoho Corporation

YouTube

What is YouTube?

YouTube is a free video-sharing platform that allows users to watch, create, and upload videos to share with others.

How to connect your YouTube account to Zoho Flow

1. Select the required trigger and click **Next**.
2. If there are no other YouTube connections in your account, click **Connect**. Otherwise, click **New connection**.

[App Trigger](#) > [YouTube](#) > [New Comment Added](#) > [Configure](#)

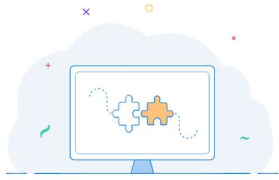

YouTube

YouTube is a video-sharing website where you can enjoy music and videos, upload original content, and share it with everyone.

New Comment Added

Triggers when a new comment is added on the specified video

 Checks for new entries every five minutes

You haven't created any YouTube connections
Creating a connection authorizes Zoho Flow to exchange data with YouTube

[Connect](#)

[Back](#) [Done](#)

3. Alternatively, you can create a new connection by navigating to **Settings**, then clicking **Connections**. Click **Create connection** and choose YouTube.
4. Enter a connection name and click **Authorize**.
5. Enter the credentials of your Youtube account in the pop-up and click **Next**.

Important update

- ① To comply with YouTube's [API Services Terms of Service](#), Zoho Flow will store up to 30 days of execution history for YouTube's triggers and actions (Currently no actions available).

API documentation

If you experience any YouTube-related errors in your flows or if you wish to learn more about the YouTube API, the API documentation can be found [here](#).

Triggers and actions available in Zoho Flow

Triggers

New Video Added to Playlist

Use this trigger to alert viewers whenever a new video is added to the designated playlist.

New Video Related to Search Uploaded

This trigger notifies you when a new video related to a specific search query is uploaded.

New Video Uploaded by User

Use this trigger to receive updates whenever a specified user uploads a new video.

New Video Uploaded to Channel

This trigger helps to receive updates whenever new videos are added to a specific channel.

Actions

No actions, for now.

Common problems

Why am I not able to view YouTube's history after 30 days of execution?

Zoho Flow's History stores the execution history of an application's triggers and actions. Depending on your subscription plan, the history is retained for 60 to 90 days. To comply with YouTube's [API Services Terms of Service](#), Zoho Flow will store only 30 days of execution history for YouTube triggers and actions (currently, no actions are available for YouTube), while the triggers and actions for all other apps will continue to be stored for the duration specified in your plan.
