

# Zoho Meeting

## What is Zoho Meeting?

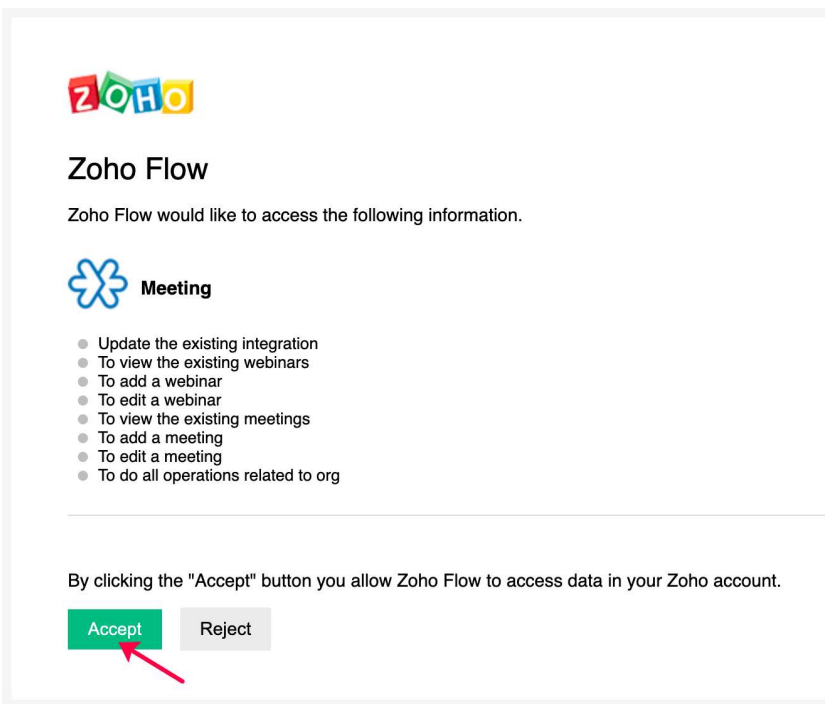

Zoho Meeting is a secure online meeting platform and webinar solution that helps people find new ways to collaborate and work remotely with efficacy.

## How to connect your Zoho Meeting account to Zoho Flow

1. Select the trigger or action required. If you select a trigger, click **Next**.
2. If there are no existing Zoho Meeting connections in your account, click **Connect**. Otherwise, click **+New**.

3. Alternatively, you can create a new connection by navigating to **Settings**, then **Connections**. Click **Create connection** and choose Zoho Meeting.
4. Enter a connection name, then click **Authorize**.
5. Click **Accept** to allow Zoho Flow to access your account.

## API documentation

If you experience any Zoho Meeting-related errors in your flows, or if you wish to learn more about the Zoho Meeting API, the API documentation can be found [here](#).

## Triggers and actions available in Zoho Flow

### Specific to Meetings

#### Meeting created

Use this trigger to send notifications when a new meeting is created

#### Meeting updated

Triggers when the details of an existing meeting, such as its duration, status, or topic, are updated

#### Meeting started

Use this trigger to add meeting-related information to a task in your project management application

#### Meeting canceled

Use this trigger to inform your team when a meeting is canceled

### **Meeting ended**

Triggers when an existing meeting has ended

### **Fetch meeting**

This action lets you fetch the details of an existing meeting, such as its presenter and co-host information, join link, agenda, status, and more, using the meeting ID

### **Update meeting**

This action lets you update the details of an existing meeting using the meeting ID

### **Schedule meeting**

You can schedule a new meeting using this action

## **Specific to Webinars**

### **Webinar created**

This trigger will let you inform your team when a new webinar is created

### **Webinar started**

Triggers when a webinar has started

### **Webinar canceled**

Use this trigger to inform the participants when a webinar is canceled

### **Webinar ended**

Use this trigger to add details about a webinar in a sheet or project management application, or post on social media when a webinar has ended.

### **Member joined for webinar**

Triggers when a member has joined a webinar

### **Member removed from webinar**

Triggers when an existing member is removed from an ongoing webinar

### **Fetch webinar**

You can fetch the details of an existing webinar using the webinar ID

### **Registrant added**

Triggers when a new registrant is added to an existing webinar

### **Poll answered**

Use this trigger to send customized emails to the members who have answered a poll

### **Schedule webinar**

Use this action to schedule a new webinar

### **Update webinar**

Use this action to edit the details of an existing webinar (such as its start time, participants, agenda, and so on)
