

Supported barcode formats

Using the **Scan QR/Barcode** feature, anyone in the session can scan a QR or barcode visible on the camera stream from their device. However, the QR or Barcode formats that can be scanned depend on the device that is sharing the camera stream.

Here's the list of supported barcode formats for devices and applications commonly used to share camera stream like

- web browser
- mobile (Android, iOS) devices
- smart glass (Android)

Web browser
