

Add associated custom app

^ Table of contents

▸ Prerequisites

▸ Add associated custom app:

General Info: The Free plan allows you to add only up to 3 non-Zoho apps.

Prerequisites

Permissions required to perform this action:

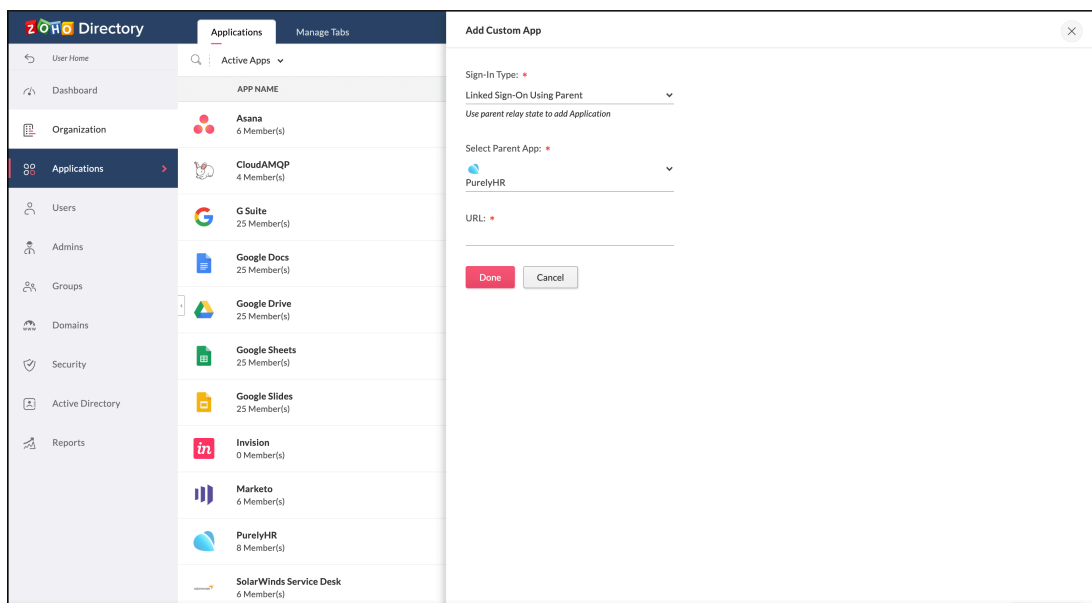

- Add apps
- Assign apps

Add associated custom app:

1. Sign in to [Zoho Directory](#), then click **Admin Panel** in the left menu.
2. Go to **Applications**, click **Add Application**, then click **Create Custom App**.
3. Name the app and enter a description if needed.
4. Click **Select SSO mode**, then select **Linked Sign-On Using Parent** to add an Associated App.

 **Note:** **Linked Sign-On Using Parent** will be available only if a non-Zoho app has been added already.

5. Select the parent app from which the SAML configuration should be inherited.
6. Enter the URL of the landing page under *URL*.

7. Click **Done**, then click **Create**.

8. Click **Manage App** to assign the app to users, **Open App** to access the app, or **OK** to continue adding apps.
