

Install the PageSense code snippet on Wix

If you're using [Wix](#), cloud-based software to build and customize your online business website, you can add the PageSense snippet code on your Wix sites to start quickly start tracking and understanding all of your website data with ease. This installation is quick to implement, and does not require any coding knowledge. Once the tracking code is installed, you can use the diverse set of website analytics feature available in PageSense, such as heatmap, session recordings, funnel analysis, form analytics, and others, to measure the performance and collect visitor activity metrics of your site.

Important: Wix only allows custom tracking codes to be installed on sites with a Premium Plan and with a connected domain. Please check the plan you are subscribed to before adding the PageSense code snippet.

To install the Pagesense snippet code using Wix:

1. Open your Zoho PageSense account on the web browser, click **Snippet** on the top bar and then **Copy**. This copies your Project snippet.

Snippet

Install and verify the code snippet on your website to start collecting visitor metrics.

Synchronous

Asynchronous

```
<script src="https://cdn.pagesense.io/js/zohotest/c0935cb65c64153b6c95405642f9718.js"></script>
```

Send via email

Copy

Once the code is installed, PageSense will start tracking website visitor data using cookies. We recommend setting up a privacy consent banner on your website to make visitors aware of the use of cookies.

[Configure Privacy Settings](#)

Integrate with GTM

To install the code snippet:

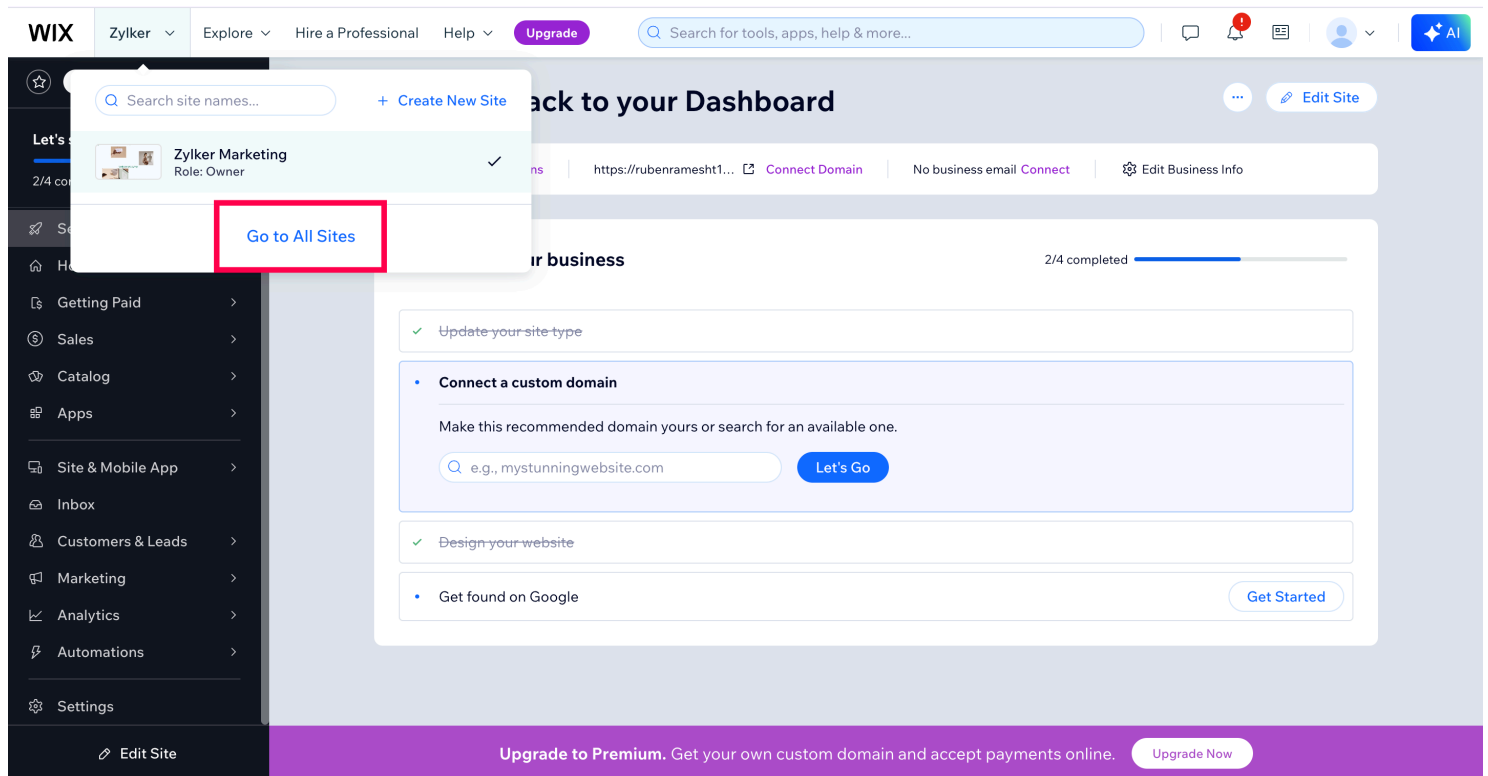

Copy and paste the code snippet into the **<head>** tag of your website to track visitors and collect feedback. For more help, refer to our [online documentation](#) or write to us at support@zohopagesense.com.

Verify Installation

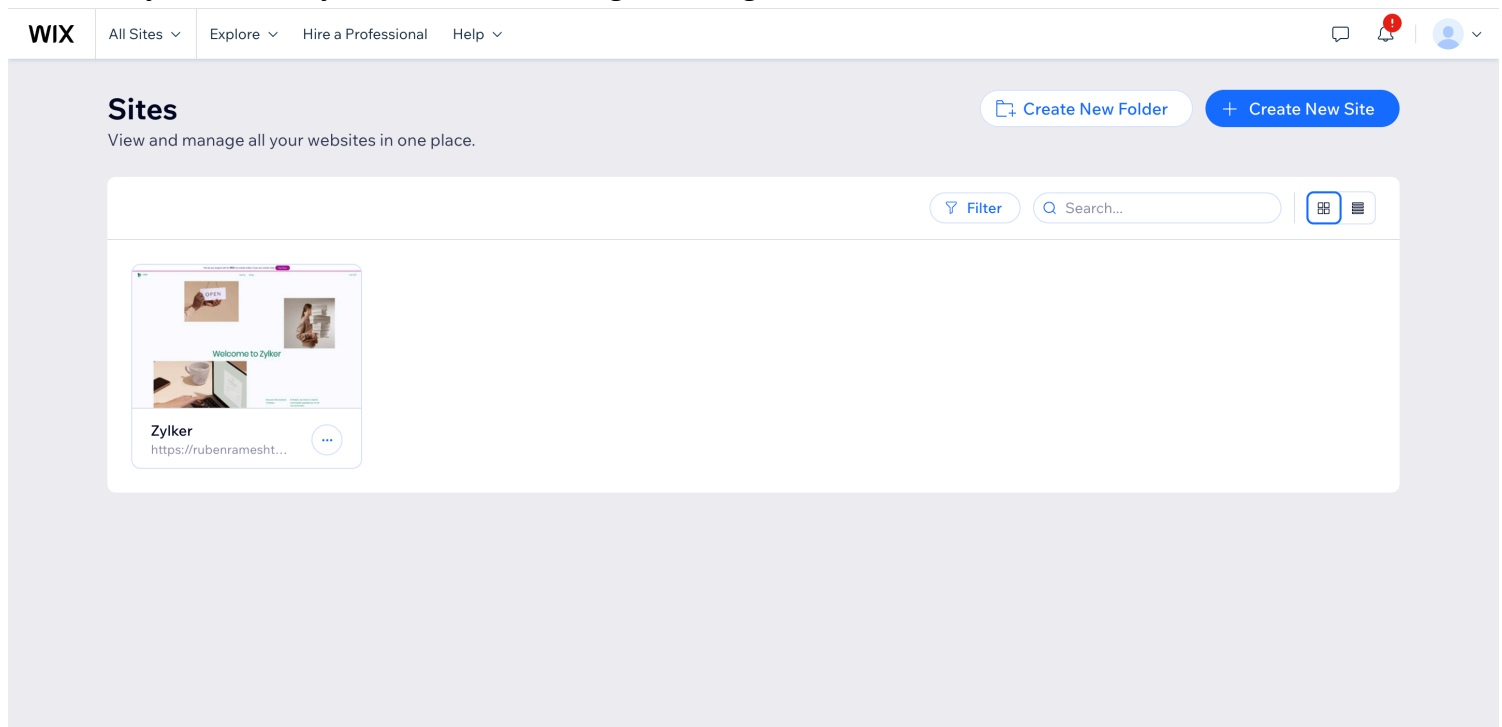

Verify

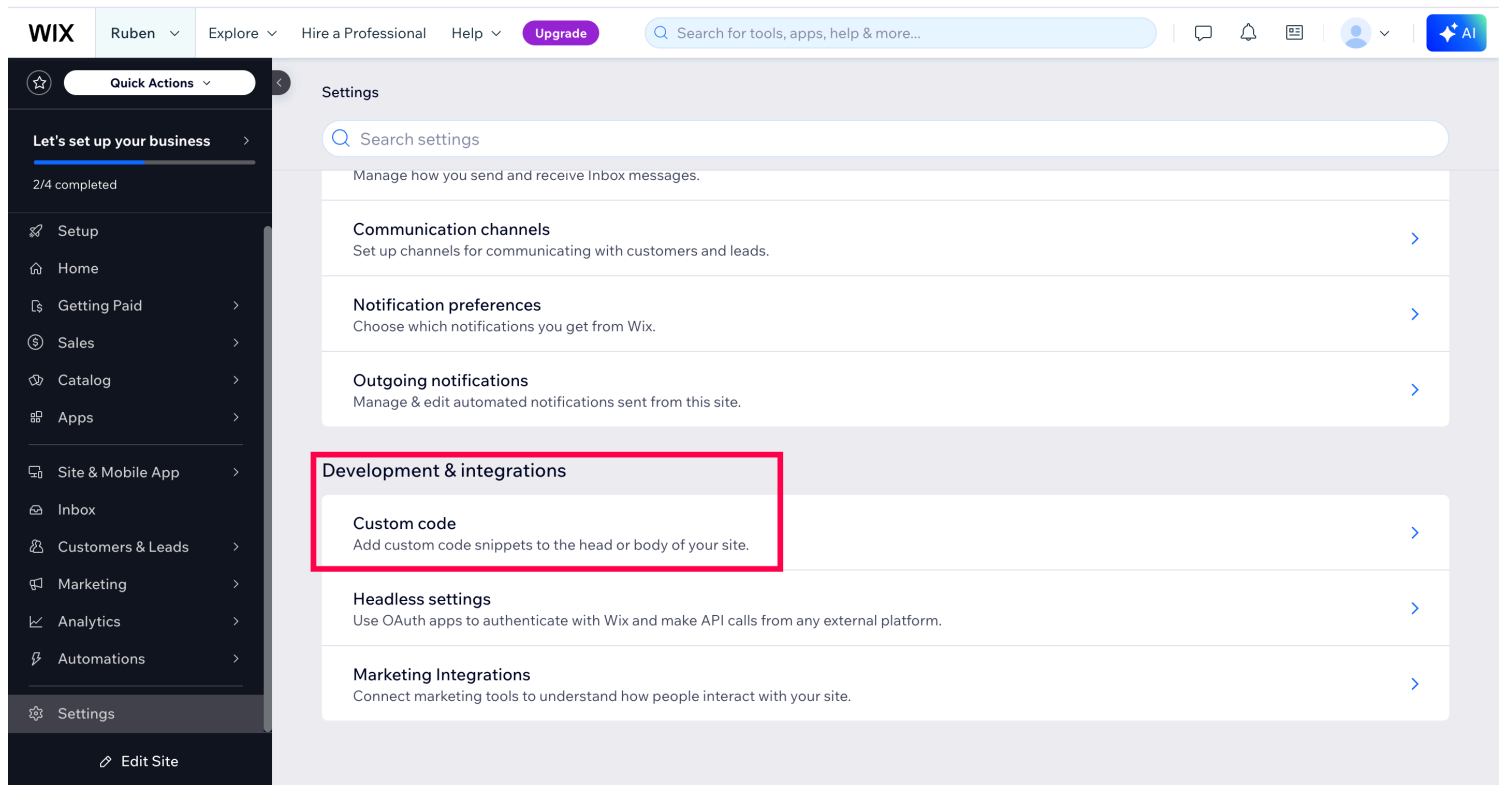

2. Log in to your Wix account on the web browser, click **All Sites** on the top bar.

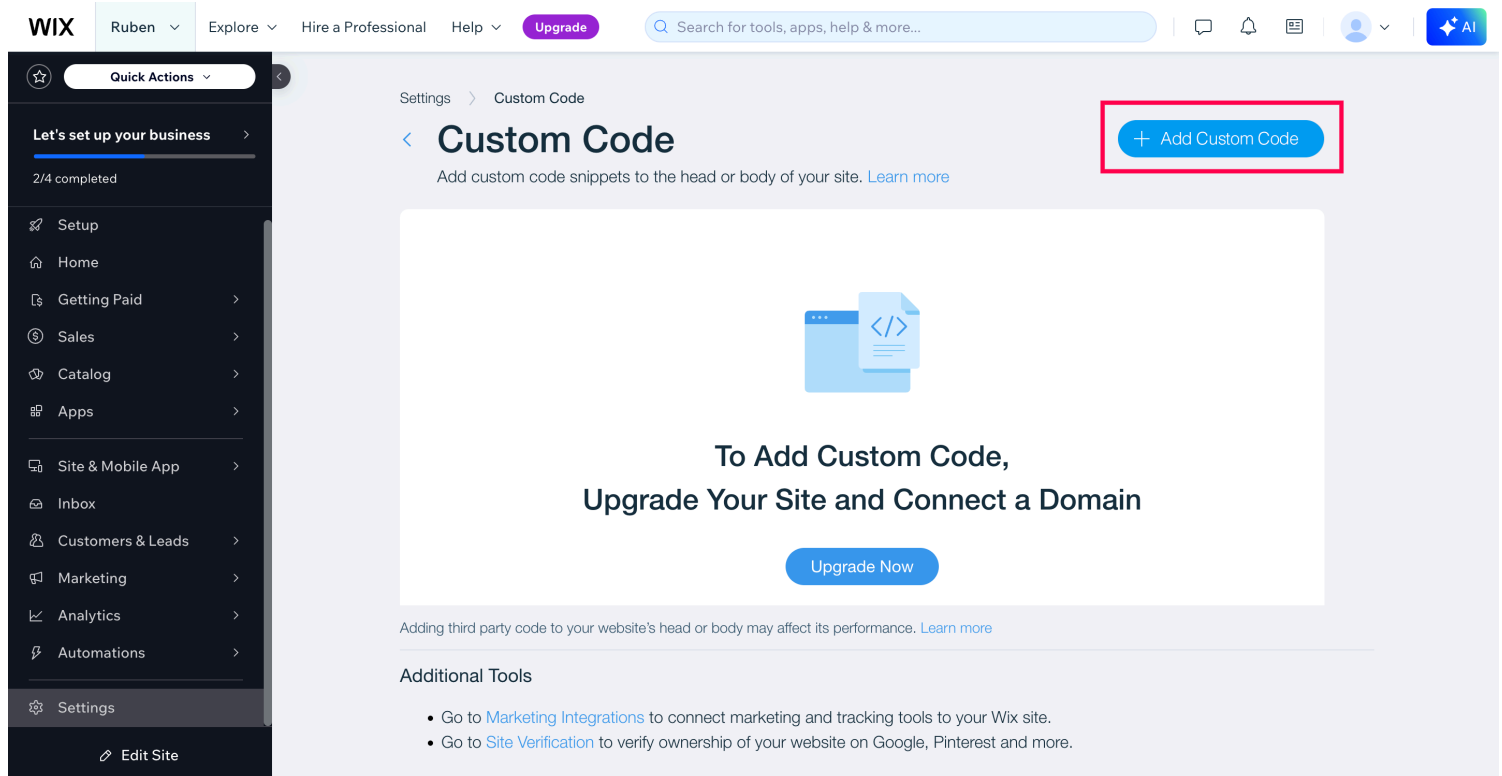

3. Choose your website you wish to track using Zoho PageSense.

4. Click **Settings** on the left pane and then select **Development and Integrations**, click **Custom code** from the list.

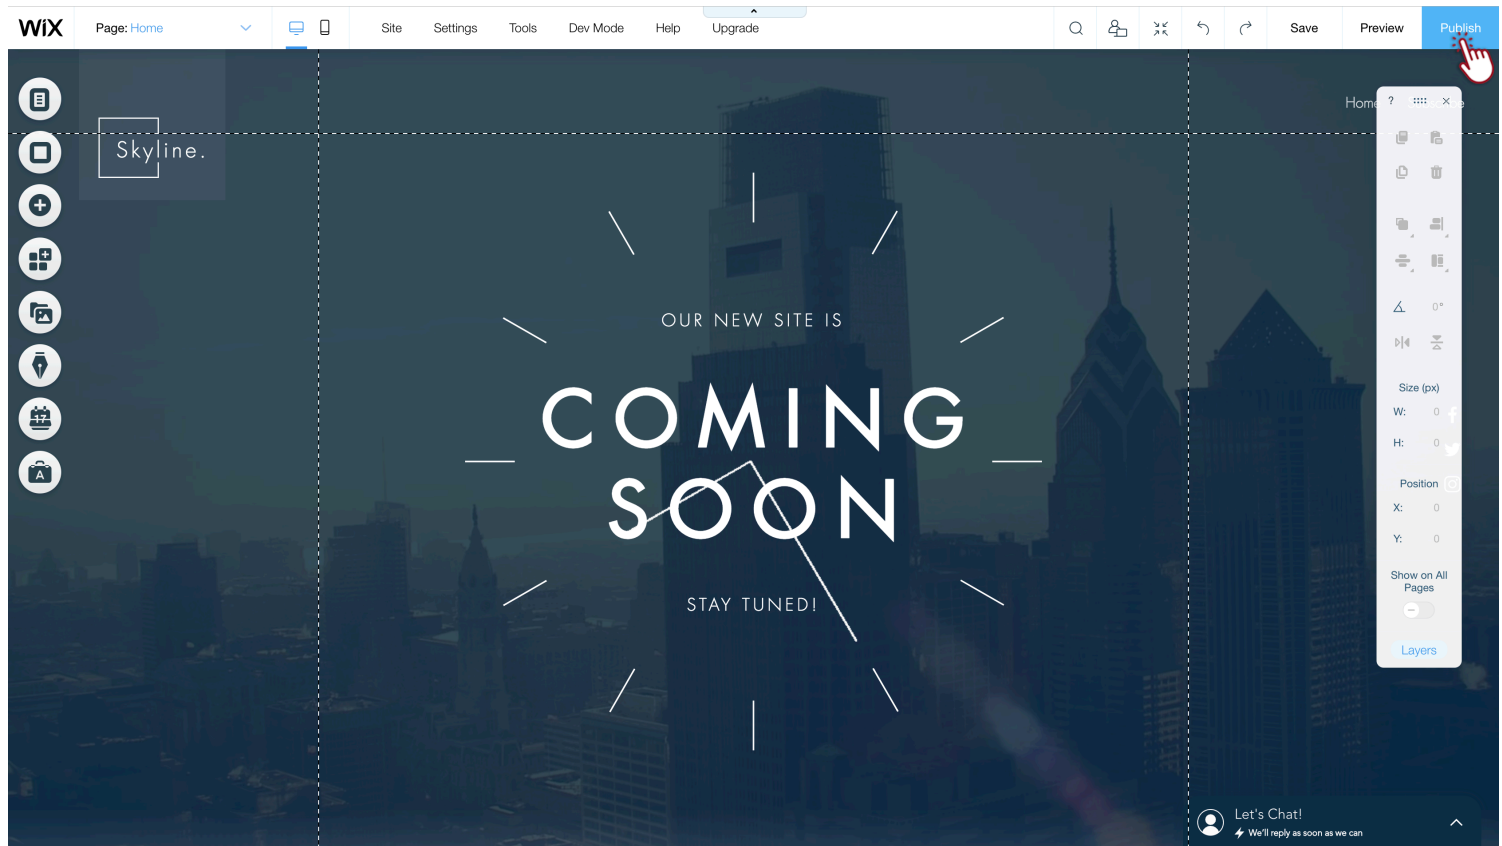

5. Click on the **+Add custom code** button in the top right corner and paste the **PageSense snippet**.

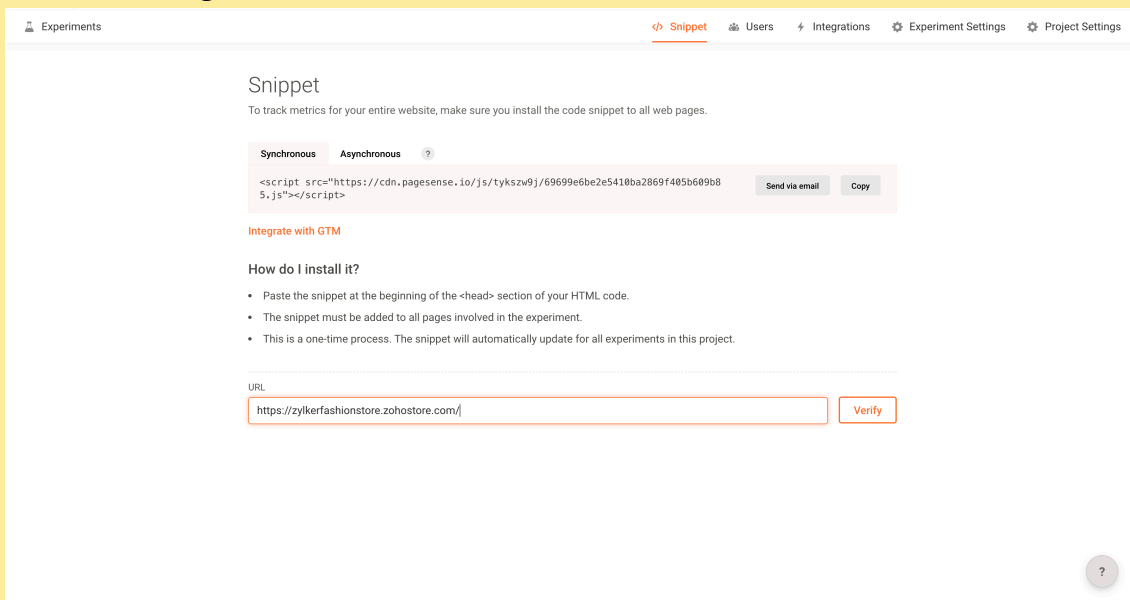

6. Paste the PageSense snippet copied in *Step 1* above inside the Custom Code text box provided.

7. Add a name for your snippet code, choose *Add Code to Pages* as **Load code once** and then *Paste Code In* to be **Head**.

8. Finally, click **Apply**. Navigate back to your main page editor and publish your changes. You will be able to create experiments and track your website metrics in Zoho PageSense.

Note: You can verify if the code snippet is installed on your web page successfully by entering the experiment URL in the *Verify Your URL* section of the **Snippet** page in Zoho PageSense account as shown in the figure below.

We hope this documentation helps make the process easy for you. Please feel free to reach out to us anytime by dropping an email to support@zohopagesense.com if you need more explanation or have any questions.
